

The decentralized way of acquiring media content

Meet ReportR!

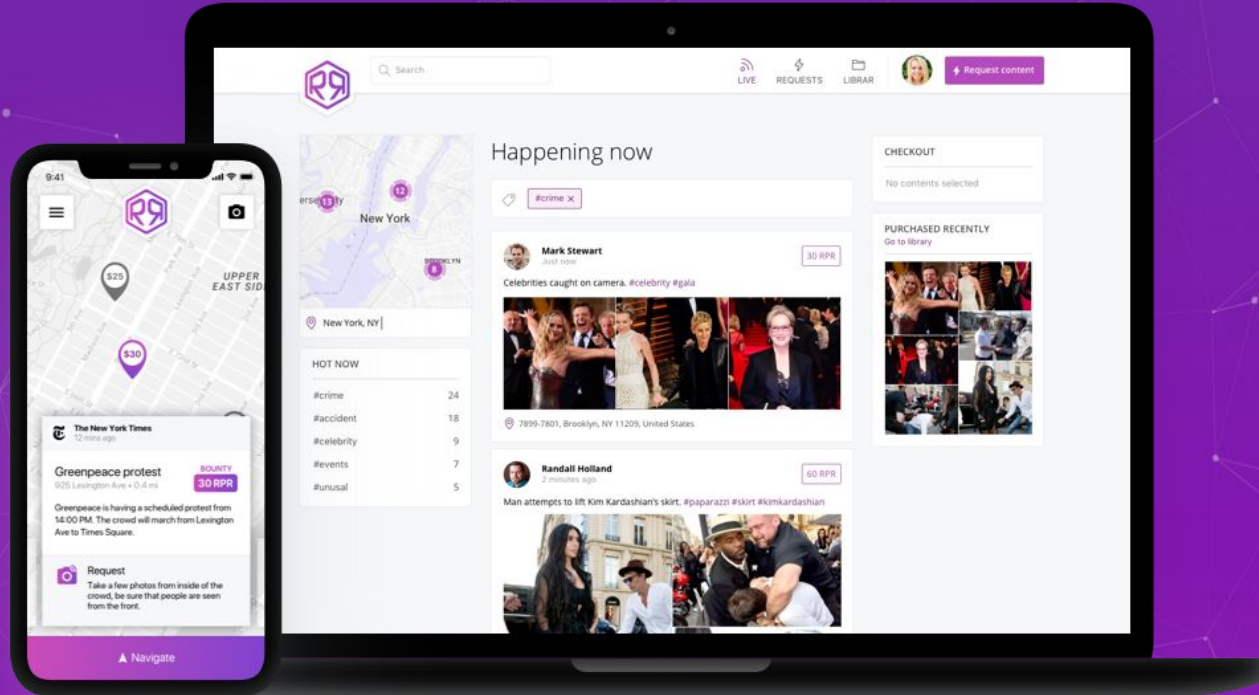

Quality content comes at a high price
and is very difficult to produce

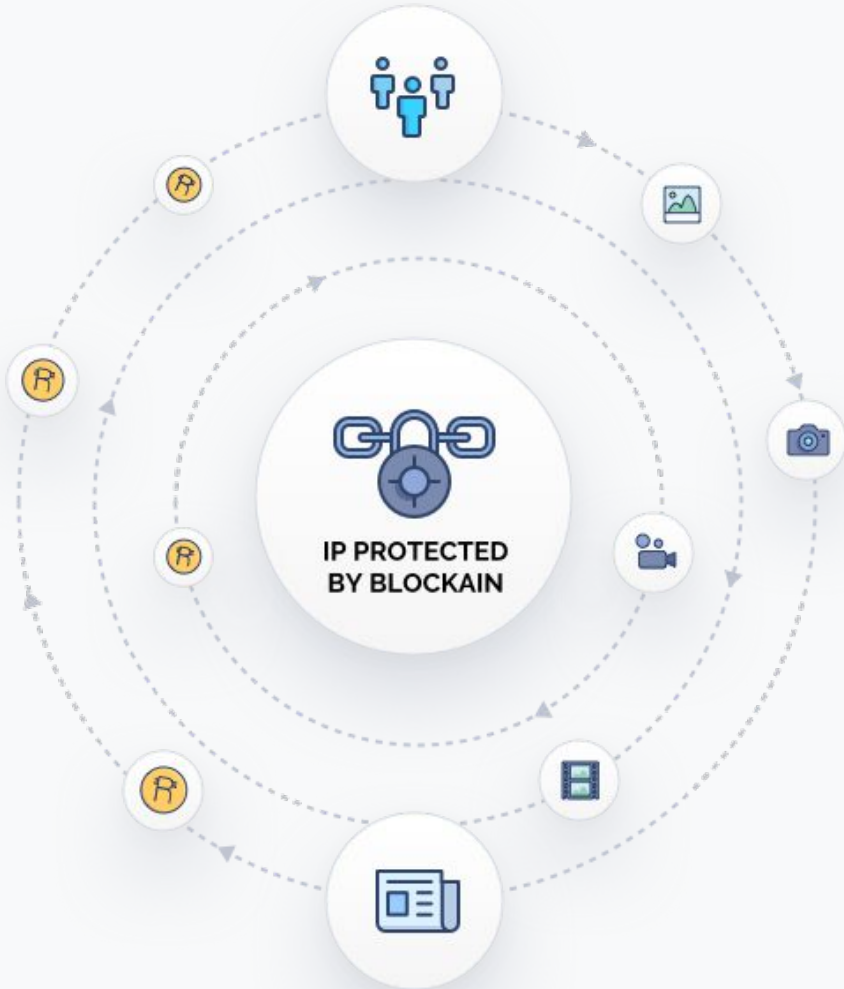

Currently, using user-generated content carries authenticity and legal risks for publishers

ReportR is a platform where publishers can buy verified user-generated content and use it legally

We use **Blockchain technology** to decentralize the news content market

Cutting-edge technologies are applied to ensure content's safety and authenticity

Smart contract
Verification and rating
Fake filters
Auto exchange

In the near future
anyone can become a
ReportR soon ... and
**the next media
revolution** is right here
